Phone: (360) 740-1151 FAX: (360) 740-1471 E-mail: DEM@lewiscountywa.gov

PREFACE

The AMBER Alert Plan is written for Lewis County law enforcement and broadcast entities and is a collaborative effort between the radio broadcast media, law enforcement agencies and Local Area Emergency Communications Committee (LAECC) within Lewis County. The AMBER Alert Plan is a voluntary enhancement of and an appendix to the local Emergency Alert System (EAS) Plan. The goal of the plan is the safe and swift return of children who are abducted or become missing under specific criteria, by providing accurate information to the public and gaining their assistance in locating the child.

A national study conducted by the Washington State Attorney General's Office found that nearly seventy-five percent of the nation's children who were abducted and murdered were dead within three hours of the time of their abduction. Given this small window of opportunity for a safe recovery of an abducted child, the police community must depend on the assistance of concerned citizens to help with the safe recovery of our children.

The purpose of the AMBER Alert Plan is to utilize the local and statewide radio, television media and the Washington State Department of Transportation (DOT) to assist police departments in the recovery of an abducted child. The local law enforcement agency initiating an AMBER Alert will notify the Washington State Patrol who, in turn, will use the EAS (Emergency Alert System) to notify the media and DOT of the AMBER Alert activation. Radio and television media will broadcast the description of the missing child, details of the abduction, abductor information, vehicle information, possible direction of travel and any other information deemed helpful by the investigating agency. DOT will place similar, though abbreviated, information on freeway traffic signs. The broadcast will advise the public to call 911 with any possible information regarding the Alert.

The Local AMBER Review Committee (LARC) was formed to manage and oversee the plan, supervise training, review all activations to ensure compliance with activation criteria, and clarify any procedural issues.

The Plan outlines the policy and procedures for law enforcement to alert radio broadcast and television stations by utilizing the Emergency Alert system (EAS) in the same way alerts are disseminated during natural and manmade disasters.

This plan is not meant to dictate how a given agency investigates the report of a missing or abducted child. Each individual agency will be responsible for developing and following their own procedures for the investigation of those types of cases. The Lewis County AMBER Alert Plan is to be used as a standardized tool to assist area law enforcement in the recovery of children. Detectives, Search and Rescue and utilization of other resources still remains the responsibility of the initial investigating agency.

The commitment to the Lewis County AMBER Alert Plan sends a strong message that crimes against children are intolerable. The AMBER partnership between law enforcement, broadcasters, and the public has enormous potential to help in apprehending predators and bringing abducted children home safely.

Lewis County
AMBER ALERT PLAN

(America's Missing: Broadcast Emergency Response)

Appendix to:
Lewis County EAS (Emergency Alert System) Plan
Lewis County Comprehensive Emergency Management Plan (CEMP)

I. INTRODUCTION

A. PREFACE

The Lewis County and area cities' "Lewis County AMBER Alert Plan" is a collaborative effort between Lewis County area law enforcement agencies, media, Washington State Patrol and the local broadcasters. Numerous other state and local agencies are part of this plan. The goal of the plan is the safe and swift return of children who are abducted or become missing under specific criteria, by providing accurate information to the public and gaining their assistance in locating the child. This will be accomplished by sharing and utilizing each other's assets.

B. PURPOSE

To provide law enforcement agencies at both the local and state level immediate access to the public broadcast media, and on-air signals of broadcast stations following an initial report of suspicious circumstances involving a child's disappearance. The intent is to disseminate accurate information about the disappearance of a child as quickly as possible. This immediate dissemination will enhance the probability of locating the child.

C. SCOPE

This plan applies to all local law enforcement entities in Lewis County and the Emergency Alert System (EAS) Relay Network in disseminating emergency information and broadcasts concerning child abduction. The Washington State Patrol (WSP) and State Emergency Management Division (EMD) are key participants in the alert process. All AMBER Alert activations of the EAS and the Portal for AMBER Alerts will be statewide in scope. The Washington Statewide AMBER Alert Plan solely governs and authorizes the use of EAS and the Portal for AMBER Alerts throughout Washington State. The Washington State Patrol is accountable to provide timely activation decisions that are consistent with the State planning criteria.

II. DEFINITIONS

A. LOCAL

1. AMBER

America's Missing: Broadcast Emergency Response

2. EAS

The Emergency Alert System that is utilized to send emergency messages to the public through local broadcast media. EAS utilizes a local relay network to carry out the alert notifications.

3. LAECC

The Local Area Emergency Communications Committee that oversees and administers the local EAS Plan.

4. LARC

The Local AMBER Review Committee that oversees and administrates the local AMBER Alert Plan. This committee is chaired by law enforcement.

5. State Emergency Communications Committee (SECC)

The State Emergency Communications Committee that provides guidelines to the LAECC for the development and maintenance of the local EAS plan and network.

6. Statewide AMBER Alert

An **America's Missing: Broadcast Emergency Alert** that utilizes the statewide Emergency Alert System (EAS) and web portal to notify citizens of an active child abduction situation.

B. GOVERNANCE OF THE STATEWIDE AMBER ALERT PLAN

Local, state, and tribal law enforcement agencies, broadcasters, emergency management officials, and the Department of Transportation and Information Services combine their efforts through the following Statewide AMBER Alert governance model to recover abducted children.

1. State AMBER Alert Manager

The Washington State Patrol (WSP) is the lead agency for the Washington Statewide AMBER Alert Plan. The Chief of the WSP is the State AMBER Alert Manager and

has final decision-making authority over all aspects of the Statewide AMBER Alert Plan. While the Chief of the WSP is ultimately accountable for program success, this responsibility is shared with other entities that form the AMBER Alert Advisory Committee.

2. State AMBER Alert Coordinator

The AMBER Alert Coordinator is responsible for managing the operations of and procedures for the AMBER Alert Web Portal. Any recommended changes or improvements to the Portal will be made through the AMBER Alert Advisory Committee to the AMBER Alert Manager for approval.

The AMBER Alert Coordinator is also the single point of contact for Washington State with the Department of Justice and the National Center for Missing and Exploited Children in regard to AMBER Alerts.

3. State AMBER Alert Advisory Committee

The AMBER Alert Advisory Committee provides administrative oversight to develop, implement, review, and recommend revisions to all aspects of the Washington Statewide AMBER Alert Plan. Such recommendations are made to the State AMBER Alert Manager. The AMBER Alert Advisory Committee charter further defines its purpose, membership, authority and decision making process.

4. State AMBER Alert Review Committee

The AMBER Alert Review Committee conducts after action reviews of all AMBER Alert activation requests and alerts. It evaluates the effectiveness and timeliness of key decisions, actions, and results. The committee recommends policy and procedure improvements to the AMBER Alert Advisory Committee. This review committee is convened by the Washington Association of Sheriffs and Police Chiefs and is further defined by its charter, which is approved by the State AMBER Alert Manager.

5. State Emergency Communications Committee (SECC)

The State Emergency Communications Committee (SECC) has been delegated authority by the Federal Communications Commission (FCC) to create the State Emergency Alert System (EAS) Plan and manage the Emergency Alert System (EAS) operations in Washington. Broadcasters must comply with the SECC's State EAS Plan to be in compliance with FCC regulations.

Local AMBER Alert Plans must be approved by the SECC. The SECC shall provide the names of all law enforcement agencies with approved plans to the Washington State Patrol (WSP).

6. State AMBER Web Portal

The single statewide web source for the latest detailed AMBER Alert information and photos. The portal can be accessed at: <http://www.WashingtonAMBERAlert.com>.

7. State Portal Operations Group

This committee assesses Portal usability, recommends improvements and implements changes to the Portal. Recommendations are made to the Advisory Committee and the State AMBER Alert Manager.

III.POLICY

A. AMBER ALERT PLAN

The Lewis County AMBER Alert Plan for local law enforcement will guide the policies and procedures for requesting local alerts. The Plan shall not conflict with the Washington State AMBER Plan. Any conflicts shall be brought to the attention of the Local AMBER Review Committee (LARC).

B. LOCAL AMBER REVIEW COMMITTEE (LARC)

The Lewis County AMBER Alert Plan shall provide for a Local AMBER Review Committee (LARC) to oversee the plan, supervise AMBER Alert training, review all activations to ensure compliance with activation criteria, and clarify any procedural issues.

A law enforcement representative shall chair the LARC that shall consist of at least the following members:

- 3 - law enforcement personnel chose at the discretion of the law enforcement community
- 1 - E911 Communications member
- 1 - LAECC member
- 1 - DEM Deputy Director
- 1 - News media member
- 1 - Local Washington State Patrol (WSP) member

The Lewis County Local AMBER Review Committee (LARC) may establish additional categories of representation as the needs arise.

The LARC shall review all local Lewis County AMBER alerts within thirty (30) days of activation and make any necessary changes to the policy and procedures. The LARC shall forward information on the reasons for activation within thirty (30) days to the Washington State AMBER Review Committee. The information provided shall consist

of the reasons for activating AMBER, supplemental reports from the activating agency, and any other pertinent information justifying the alert activation.

C. AUTHORITY

The Washington Statewide AMBER Alert Plan governs and authorizes the use of the Emergency Alert System (EAS) and the Portal for AMBER Alerts throughout Washington State. The Washington AMBER Alert Statewide Plan takes effect when the local law enforcement agency has determined in its investigation that the incident qualifies under the criteria of the Washington Statewide AMBER Alert Plan and the local law enforcement agency requests the Washington State Patrol (WSP) to initiate activation of the EAS and the Portal. All AMBER Alert Activations of the EAS and the Portal will be statewide in scope.

Law enforcement shall control the decision to request a local AMBER activation, and the content and duration of each alert message. To be granted authorization to request AMBER Alert activations, law enforcement must first:

- Officially approve and sign on as a members of the Lewis County AMBER Alert Plan
- Appoint a representative to receive a copy of the Plan
- Assign staff to complete the AMBER training and pass any required tests
- Ensure that a copy of the AMBER Plan is available or has been assigned to each of the proposed users

The LAECC shall review all relevant material from the requesting agency and approve or deny the request. The LAECC will then send written notification of their decision to the requesting agency and the LARC Chairperson. The requesting agency may appeal any LAECC decision by providing written documentation to the Chairman of the LAECC. Appeals will be reviewed and scheduled for the next regular LAECC meeting.

The Lewis County AMBER Alert Plan is an appendix to the Lewis County Emergency Alert System (EAS) Plan. The AMBER Alert Plan must be reviewed and approved by the Committee (LAECC). The LAECC shall then forward the plan to the State Emergency Communications Committee (SECC) who must also review and approve the Lewis County Local AMBER Alert Plan. Both the SECC and the LAECC are mandated to exist by the Federal Communications Commission (FCC).

The Local AMBER Alert Plan must be approved by the Local Area Emergency Communications Committee (LAECC) and State Emergency Communications Committee (SECC) prior to any activation of the AMBER Alert system. The Washington State Patrol (WSP) will receive notification from the SECC of the approved plan.

The content of this AMBER Alert Plan, with exception of the law enforcement investigative procedure, shall be subject to review and approval first by the LAECC, and then by the SECC.

The Washington Statewide AMBER Alert Plan solely governs and authorizes the use of EAS and the Portal for AMBER Alerts throughout Washington State.

The statewide plan recognizes approved local AMBER Alert plans, which specify local law enforcement agency procedures to investigate a child abduction case, approve AMBER Alert activations, coordinate community response and direct the recovery of the child.

By January, 2005 all agencies without an approved plan were required to have a mutual aid agreement in place with an agency that has an approved plan. (Cities within Lewis County that contract with Lewis County for Emergency Management services are considered to have met this requirement).

D. AMBER ALERT CRITERIA

Law enforcement shall ensure that the following criteria are met prior to requesting an AMBER Alert:

1. The child is under eighteen (18) years of age and is known to be abducted and is not a runaway or thrown-away from home.
2. The abducted child is believed to be in danger of death or serious bodily injury.
3. The AMBER Alert activation should occur within four (4) hours of the event qualifying under the criteria as an AMBER Alert unless circumstances or the timeliness of the information warrant otherwise.
4. There is enough descriptive information available to believe that an AMBER Alert activation will assist in the recovery of the child. Must include as much of the following information as possible:
 - a. Where the abduction took place
 - b. A specific physical description of the child. Can include clothing worn when last seen, height, weight, age, hair and eye color, hair length, any additional distinguishing physical characteristics
 - c. A physical description of the abductor. Can include approximate height, weight, hair color/length, eye/skin color, clothing, and any distinguishing physical characteristics
 - d. Place last seen
 - e. Description of the vehicle. Can include color, make, model, license number, approximate year (older, newer)
5. The incident has been reported to and is under investigation by a law enforcement agency.

E. NON-QUALIFYING USES OF AMBER ALERT PROGRAM

Based on the above criteria, the following situations **WOULD NOT QUALIFY** for AMBER Alert activation:

- Missing children believed to have run away from home
- Missing child taken by non-custodial relative in a child custody case
- Lost children
- As a tool for continuing an investigation after the initial abduction has occurred
- Police searches for criminal suspects (murder, bank robber, etc.)
- Missing elderly and Alzheimer patients
- Child leaves voluntarily with known criminal suspects, but is not in personal danger

F. REQUESTING STATE AMBER ALERT ACTIVATION

The law enforcement jurisdiction from which an abduction occurs shall be responsible for requesting the Washington State Patrol (WSP) to activate the Statewide AMBER Alert. This request should be made through E911 Communications, but under exigent circumstances may be made directly to WSP in Vancouver.

The requesting investigative agency shall provide a name and phone number to the Washington State Patrol (WSP) for the assigned investigator and Public Information Officer (PIO).

News inquiries and investigative information should be routed to the designated numbers.

When the Washington State Patrol (WSP) is notified, they will review the request to ensure all activation criteria have been met, ensure that the requesting entity has or is part of an approved plan, and then provide secured access to the Portal. The investigating agency shall then access the Portal and submit the AMBER Alert.

Following the broadcast of the AMBER Alert EAS message through the state relay network, the message will be forwarded through broadcast media outlets. At this time and throughout the alert, broadcasters should refer to the Portal at <http://www.WashingtonAMBERAlert.com> as the single source for the latest detailed AMBER Alert information and photos. The investigative agency will add updated information to the Portal as it becomes available. The Portal will automatically push simultaneous notification that new information is available to broadcasters, law enforcement, the public and many partners who forward AMBER Alerts to a wide collection of audiences.

G. REQUESTING INTERSTATE AMBER ALERT ACTIVATION

When the investigating agency determines it is necessary to extend an AMBER Alert into another State, they shall contact Washington State Patrol (WSP) Tacoma with such request.

Washington State Patrol (WSP) Tacoma will verify if the target state is a member of the interstate AMBER Plan, then contact them providing the AMBER information and request interstate AMBER Alert activation (reference the *Interstate AMBER Memorandum of Understanding*).

H. WEB PORTAL UNAVAILABILITY

If the AMBER Web Portal is unavailable for entering activation or updated information, all information normally sent to the Portal shall be transmitted to the Washington State Patrol (WSP) by telephone or fax.

The Washington State Patrol (WSP) will forward all information to State EMD who will then activate the EAS to transmit the AMBER Alert information.

The investigating agency should anticipate and staff accordingly for increased media, law enforcement, and public call volume should the Portal be unavailable.

I. ADDITIONAL INFORMATION

The investigating agency responsible for the AMBER Alert shall provide additional alert information to the web portal as necessary.

J. CANCELING AN AMBER ALERT

The investigating agency responsible for the AMBER Alert shall be responsible to cancel the alert when the child is located or it is confirmed that the child is no longer in any danger.

K. AMBER REPORT FORMS

The law enforcement entity requesting an AMBER Alert shall utilize the pre-approved AMBER forms in addition to their normal report requirements:

- **AMBER Alert - Report Form**
(Attachment A, page 14)
- **AMBER Alert - Media Notification Script Form**
(Attachment C, page 16)
- **AMBER Alert - Fax Cover Sheet Form**
(Attachment D, page 17)
- **AMBER Alert - Tip Sheet Form**
(Attachment E, page 18)
- **LARC AMBER Alert Activation Report**
(Attachment F, page 19)

- **AMBER Alert Cancellation Form**
(Attachment G, page 20)
- **AMBER Alert Debrief Form (4)**
(Attachment H, 4 pages, 21-24)

L. PLAN MAINTENANCE, TRAINING AND EXERCISES

1. ANNUAL REVIEW

The AMBER Alert Plan shall be reviewed annual by the Local AMBER Review Committee (LARC). The Director of Emergency Management, or his designee, will forward appropriate recommendations for plan revisions to LARC. After LARC reviews and adopts the revised plan, the Director of Emergency Management, or his designee, shall forward copies of the plan to the Lewis County LAECC and Washington State Emergency Communications Committee (SECC) for their approval. (The SECC approval of the plan qualifies Lewis County as an approved AMBER Plan holder with the ability to request local AMBER Alert activations).

2. AFTER AMBER ALERT ACTIVATION REVIEW

A LARC review committee shall also review the AMBER Alert Plan within 30 days after an Alert. Recommended changes will be forwarded to the LARC for adoption.

3. TRAINING AND EXERCISES

An annual training/exercise program will be provided by the law enforcement LARC membership. See Attachment B, page 15, for Training Compliance Certification Form.

IV. SITUATION

A. GENERAL

The safe recovery of an abducted child depends upon the cooperative effort of law enforcement, the media, and concerned citizens working together in an organized and informed manner.

The ability to refer to a countywide abduction response plan (AMBER) and swiftly implement such a plan is critical for transmitting information to the public to enlist their support in locating the abducted child. The AMBER web portal provides a mechanism to implement, update and inform all parties involved in the alert process.

B. PLANNING ASSUMPTIONS

The first few hours of any child abduction case are often chaotic and lack organized communitywide response.

The Emergency Alert System (EAS) is the system that is utilized to transmit an AMBER Alert.

For AMBER to be effective, the local EAS system, the AMBER Web Portal, must be operational and participants within the system must be properly trained in the policies and procedures governing the local and state EAS and AMBER plans.

Other methods of notifying the public will be utilized in addition to the AMBER Alert.

Law enforcement efforts may be hampered by other local incidents occurring at or near the same time as an abduction.

The local media will actively participate in expediting the broadcast of the local AMBER Alert.

V. CONCEPTS OF OPERATIONS

A. GENERAL

The AMBER Alert Plan is a locally-based, voluntary enhancement of the local Emergency Alert System (EAS). It is an appendix to the Local Area Emergency Communications Committee (LAECC) Emergency Alert System (EAS) Plan.

In order to increase effectiveness, all local broadcast stations and law enforcement entities should participate equally in the AMBER Alert planning and training.

B. DIRECTION AND CONTROL

The operational direction and control of an AMBER incident will at all times be the responsibility of the law enforcement entity with jurisdiction. Law Enforcement is considered the incident command for AMBER alerts. The decisions involving activation and termination will be handled by the responsible law enforcement entity and the WSP.

The AMBER Web Portal will be used to initiate, update and advise on AMBER Alert investigations.

In large-scale operations that involve multiple entities, the investigative law enforcement agency may request the Division of Emergency Management (DEM) to activate the Emergency Operation Center/Emergency Coordination Center (EOC/ECC) and provide coordination with surrounding jurisdictions. Coordination may include ensuring consolidated communications, news and media updates and releases, and addressing resource requests.

C. BROADCASTS

After the initial AMBER Alert, the investigating agency shall monitor the situation to determine when and if additional EAS alerts are necessary.

Once the station has transmitted the initial AMBER Alert, follow-up announcements should be voiced by station personnel and can be incorporated into regular station programming as the station sees fit.

After the initial statement is transmitted, stations should re-broadcast additional AMBER Alert announcements in the following manner:

1. First three (3) hours:

Every 20 minutes for the first three (3) hours, unless the AMBER Alert is terminated

2. Three to Six (3 to 6) hours:

Every half-hour for the next three (3) hours, unless the AMBER Alert is terminated

3. After Six (6) hours:

The station may continue to broadcast the AMBER Alert follow-up announcements until the AMBER Alert is formally terminated by the activating law enforcement agency or at the agency's requests.

The AMBER Alert follow-up announcements must not be a retransmission of the initial AMBER Alert, nor include the EAS header tones, event codes, etc.

VI. RESPONSIBILITIES

A. LEAD

1. Local Law Enforcement:

- Initiates investigation and reports
- Determines if incident meets AMBER criteria
- Makes decision to active AMBER
- Contacts Washington State Patrol (WSP) to approve and ensure criteria are met and to request E911 Communications access to Web Portal
- Acts as the primary incident command for all AMBER Alert situations
- Ensures telephone access for statewide tips, media, and law enforcement
- Initiates the request for broadcast of original alert
- Requests follow-up alert notifications as necessary
- Requests incident alert conclusion notifications
- Maintains majority presence and the chair for the AMBER Alert Committee

- Provides the media, law enforcement, and public contact numbers for AMBER activations
- Schedules testing and training for AMBER policy and procedures
- Ensures annual and after-activation AMBER Alert Plan reviews

2. Broadcasters:

- Monitors the EAS LRN for EAS Amber Alerts
- Broadcasts Washington State AMBER Alerts as necessary through the EAS
- Rebroadcasts AMBER alert announcements as specified within the plan
- Monitors the AMBER web portal for follow-up and cancellations notices
- Broadcasts appropriate AMBER follow-up information

3. E911 Communications:

- Maintains the EAS Encoder/Decoder for AMBER Alerts
- Conducts periodic EAS testing as directed by the LAECC and SECC procedures and testing schedules
- Contacts Washington State patrol (WSP) for access to web Portal.
- Assists law enforcement with activation and update processes as necessary

4. Washington State Patrol (WSP) - District 5

- Verifies investigative law enforcement agency has an SECC approved AMBER Alert Plan
- Provides the approved law enforcement agency with the web portal URL, logon ID, and password
- Assists the investigative law enforcement agency as necessary
- Notifies Washington State Department of Transportation (WSDOT), State Emergency Management Division (EMD) and Washington State Patrol ACCESS of the AMBER Alert
- Notifies WSDOT, EMD and ACCESS of AMBER cancellation

5. Washington State Emergency Management Division (EMD):

- Receives AMBER Alert notification via the Web Portal
- Activates the State EAS network
- Provides technical support to the local jurisdiction
- Cancels EAS AMBER Alerts as directed by the investigative law enforcement agency
- Maintains the AMBER public hotline and upon request transfers such line to the investigating law enforcement agency.

B. SUPPORT

1. Lewis County Emergency Management (DEM):

- Assists as requested by the responsible law enforcement entity with the coordination of local sources and as necessary activates the Emergency Operations Center/Emergency Coordination Center (EOC/ECC)

- Functions as the local EAS coordinator and provides support information as necessary
- 2. Washington State Department of Transportation (WSDOT):**
- Utilizes the Variable Message Signs (VMS) to provide information to the public on the AMBER Alert
 - Utilizes the Highway Advisory Radio System (HARS) to provide information to the public on the AMBER Alert
 - Updates VMS and HARS as new information becomes available
 - Terminates the WSDOT alert systems (VMS and HARS) when advised by WSP to cancel the AMBER Alert
- 3. Local Area Emergency Communications Committee (LAECC):**
- Maintains an EAS Plan with the local AMBER Alert Plan Appendix that is approved by the State Emergency Communications Committee (SECC)
 - Conducts updates and changes to the EAS plan to remain in compliance with SECC requirements
 - Ensures the EAS Local Relay Network (LRN) is functional and available to transmit and broadcast local AMBER Alerts
- 4. National Oceanic Atmospheric Administration (NOAA):**
- Maintains the Weather Radio System
 - Rebroadcasts the AMBER Alert over Weather Radio at the request of the local law enforcement agency or State EMD
- 5. State Emergency Communications Committee (SECC):**
- Provides guidance for the Local Area Emergency Communications Committee (LAECC) in developing the local EAS Plan and AMBER Alert Plan Appendix
- 6. Local AMBER Review Committee (LARC):**
- Reviews all AMBER alert activations and provides guidance to law enforcement on the AMBER Alert system
 - Makes changes and decisions guiding the AMBER Plan and training requirements
 - Ensures proper training and documentation on the local/state AMBER Alert Plans
- 7. National Center for Missing and Exploited Children (NCMEC):**
- Provides and monitors the Cyber Tip Link
 - Posts missing children alerts
 - Provides educational materials for children, teachers, and the public
 - Provides statistical information

AMBER ALERT DEBRIEF FORM

Lewis County

AMBER ALERT DEBRIEF AND AFTER ACTION REPORT INSTRUCTIONS

(Page 1 of 4)

The purpose of the Debrief and After Action Reports (AAR) are to identify both successes and challenges from an Alert that can be used as a learning tool for others and make changes to the AMBER Alert Plan.

The information provided by you will be evaluated by the **Local AMBER Review Committee (LARC)** and action taken on those items that can be improved or changed.

Everyone, (Law Enforcement, Dispatchers, Emergency Management staff, local broadcasters), are requested to complete a Debrief Form for each AMBER Alert activation they participate in.

The LARC committee will complete a review of the comments/suggestions received and develop the After Action Report (AAR) and Improvement Matrix. The LARC committee will complete a Lewis County LARC AMBER Alert Activation Report and submit a copy to the Washington State AMBER Review Committee within 30 days of the alert activation.

Emergency Management staff will review and revise the Lewis County AMBER Alert Plan as necessary.

Once completed you can return your Debrief Form by:

Fax: (360) 740-1471

Mail: Lewis County Sheriff's Office
Deputy Director
Division of Emergency Management
345 West Main Street
Chehalis, WA 98532

Memorandum of Understanding
Between Law Enforcement Entities
and
Local AMBER Review Committee (LARC)
(Page 1 of 2)

This agreement governs the use of the Lewis County AMBER Plan – collaborative effort between Lewis County law enforcement entities, broadcasters and the LARC in response to child abductions. “AMBER” is an acronym for America’s Missing: Broadcast Emergency Response, and it is the protocol for alerting the public to a child abduction in order to solicit information useful in the investigation and recovery of the abducted child.

LAW ENFORCEMENT:

The use of Lewis County AMBER is permitted by the law enforcement entity under the following circumstances:

- The law enforcement entity has established a protocol, special order, general order, or standard operating procedure governing the use of the Lewis County AMBER plan.
- The entity’s staff has been trained on the criteria for the activations, as well as the review process.
- The entity agrees to request an AMBER activation only when the investigative criteria have been met (see the Lewis County AMBER Alert Plan, page 5).
- The entity has specified the person(s) authorized to request an AMBER activation, and has provided the LARC with that information.

Local AMBER Review Committee (LARC)

The LARC agrees to the following duties:

- Provide guidance to law enforcement on the AMBER Alert system.
- Monitor the Lewis County AMBER Plan and review all alerts to ensure compliance.
- Maintain the system to file suggestions or grievances.
- Maintain a liaison with the Lewis County Local Area Emergency Communications Committee (LAECC) to administer the Lewis County AMBER Plan.

MODIFICATION and TERMINATION of AGREEMENT:

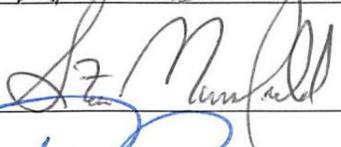

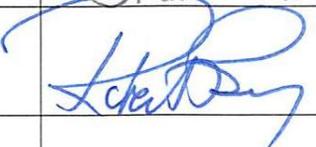

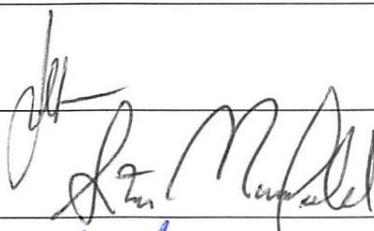

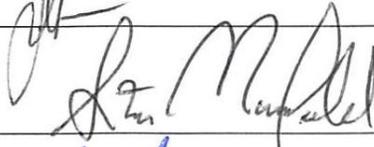

This agreement may be modified at any time the parties listed herein deem necessary. Suggested modifications to this agreement shall be developed in writing and distributed to each party for their review and comment. A modification to this agreement is approved or rejected by mutual consensus. Any party may terminate participation in this agreement by submitting written notice of their withdrawal to the other parties. A termination notice shall be provided at least 30 days in advance of the effective date of such termination.

Memorandum of Understanding
(Page 2 of 2)

EFFECTIVE DATE:

The terms and conditions of this agreement shall become effective on the date that the representative of the law enforcement entity signs this agreement. The provisions of this agreement shall remain in full force until such time as this agreement is modified or terminated by the parties.

SIGNATURES:
