## Type I or III Application

### Process:

The process for each subdivision type varies. The **general** process includes the following.

1. Applicant submits a complete application, including a preliminary plat map drawn by a Washington State Licensed Professional Land Surveyor.
2. The Planning Department reviews the application for completeness. If additional information is needed, the planning staff will notify the applicant.
3. The complete application will be routed to different departments to review. When the review is finished, the departments will notify the Planning Department of comments or conditions.
4. If the proposal is a Short Plat or Large Lot Subdivision  
Preliminary Approval will be granted with conditions or will be denied.
  - i) If the proposal is denied, the applicant will be informed, in writing, the reason(s) for denial.
  - ii) If preliminary approval is granted with conditions, the applicant will need to complete those conditions.

If the proposal is a Long Plat Subdivision

A recommendation by staff will be sent to the Lewis County Hearings Examiner for a Public Hearing.  
The Hearings Examiner's Decision is final.

5. Once the conditions of preliminary approval are met, the final plat map shall be submitted to Planning Department for final signatures or final approval application
6. After the conditions of preliminary approval are determined to be met, the Public Works and Planning Departments sign the final map for a Short Plat or Large Lot Subdivision and submit it for recording in the Lewis County Auditor's Office.

If the proposal is a Long Plat Subdivision, the final map will be reviewed by the Public Works, Public Health and Social Services, Environmental Services Division, and Planning Department to verify the conditions of preliminary approval have been completed. If all conditions of preliminary approval are complete, then the Subdivision Administrator will sign the final map and submit it for recording in the Lewis County Auditor's Office.

### Land Divisions must show:

#### All lots have building areas outside designated critical areas and buffers

Demonstrate this by showing all critical area boundaries and buffers on the proposed land division map. All buffers must comply with existing Lewis County development regulations, including, but not limited to: the Critical Areas Ordinance, the Shoreline Master Program, and the Flood Hazard Prevention Ordinance.

That the land division makes adequate provision for roads, waste disposal, and water consistent with County standards.

#### Adequate Provisions for Roads/Access

Access from a public road requires an access or approach permit. If access is proposed from a state highway, the State Department of Transportation must review and approve access. Even if there is a current access permit, the DOT must review and approve access based on the land division proposal. Roads are required to meet County standards (if they are to be dedicated to the County) or County recommendations (if they are to be private roads). A maintenance agreement must be provided, indicating how the private roads will be maintained.

#### Approved Sewage Disposal

All proposed and existing sewage systems or septic systems or connections to public systems shall be indicated on the preliminary and final map. If individual septic systems are proposed, a soil survey shall be submitted for each lot, demonstrating that a septic system is feasible, in compliance with County Health Department standards. If connections to public systems are proposed, the applicant must submit certification from the provider that sewer is available using the SAN form.

#### Approved Water

The location of wells or public water connections are required to be indicated on the map. If water from a water service provider is proposed, the applicant must submit certification from the provider that water is available in quality and quantity sufficient for the proposed use of all lots within the land division (using the WAN form – one for each proposed lot). If individual wells or a public well is proposed. The proposed locations shall be shown on the drawings and include the 100 foot radius Sanitary Control Area.

**Recording of Approved Land Division Final Map:**

All costs associated with the recording of the final map shall be paid by the applicant. All property taxes and assessments shall be paid in full for the year in which the final map is recorded. Within 30 days of approval of the final map, it will need to be recorded at the Lewis County Auditor's Office

**Other Disclaimers:**

If your parcel is in a special tax program such as Open Space Farm and Agricultural Land, Open Space Timber, or Designated Forest Land, or if you are getting a Senior Exemption on your taxes, you are encouraged to discuss any considered land divisions with the Assessor's Office BEFORE making those changes. Land divisions may involve undesired tax consequences. You may reach the Assessor's Office at (360) 740-1392.
