PUBLIC WATER AVAILABILITY NOTIFICATION

WAN #: _____ Development Permit No: _____

Parcel Number: _____ Site Address: _____

Applicant's Name: _____ Phone Number: _____

Mailing Address: _____ E-Mail: _____

Signature of Applicant: _____ Date: _____

APPLICANT MARK AND COMPLETE ONLY ONE: Option 1 or Option 2

Option 1: Two service connection water supplies *(To be completed by applicant)*

- Two connections (At least one a non-dwelling unit) ID# _____ Two dwellings units on separate parcels
 Two dwelling units on same parcel Two dwellings units one an ADU

Proposed connection location:

- Tax Parcel # _____ Lot # _____
 Short/Large/Long Plat # _____ Lot # _____

Well location, the well supplying water for this permit is located on: *(check one fill in the blanks)*

- Tax Parcel # _____ Lot # _____
 Short/Large/Long Plat # _____ Lot # _____

Signature of Applicant: _____ Date: _____

DEPARTMENT USE ONLY:

- Yes No The shared well WS# _____ has met the requirements of LCC8.55 and is approved to supply water to two connections as described in this document. This approval is not a certification of the current water quality.

Signature/Title: _____ Date: _____

Option 2: Public/Community Water Supply *(To be completed by a water system purveyor)*

System Name: _____ ID # _____ Group A or B: _____

Membership/Account # _____

This system is capable of and will supply water to: *(check one fill in the blanks)*

- Tax Parcel # _____ Lot or Space # _____
 Short Plat # _____ Lot or Space # _____

This property is located at the address listed at the top of this page. The connection is authorized or available; see note 1.

Signature/Title: _____ Date: _____

Note: This notification of availability is valid for only one year from date of approval below:

DEPARTMENT USE ONLY:

- Yes No This public water supply is in substantial compliance with WAC 246-290 Group A or LCC 8.55 Group B and is adequate/approved to furnish water to this connection.

Signature/Title: _____ Date: _____

Permit Technician: _____ Reconnection: Yes ___ No ___ Previous WAN#: _____

NOTE 1: If the development permit listed at the top of this WAN is a building permit, the water purveyor represents that its process for connection, including payment of purveyor fees, is complete and the connection is authorized. If the development permit listed at the top of this WAN is a land division or binding site plan permit, the water purveyor represents that the connection is available at the purveyor's current capacity, and the purveyor intends to serve the connection if all necessary fees are paid and its process for connection is completed—the purveyor does not guarantee through this form that the connection will be available in the future, although some purveyors may by their own rules or ordinances make such a guarantee through a separate form or process. Applicants are advised that an actual connection is required for each lot by the time of final plat approval, except in limited circumstances.

NOTE 2: Availability of water does not guarantee the granting of a building or sewage permit. We recommend applying for a sewage permit or at least a site evaluation BEFORE a well is drilled. Unsuitable soils or site may result in denial of sewage and/or building permits.

NOTE 3: High levels of **perchloroethylene** have been measured in the shallow aquifer in the vicinity of the intersection of **Hamilton and Labree Roads**. The area of investigation extends **west to Rice Road and east approximately 1/3 mile along the Hamilton Road North**. Drilling into the impacted aquifer could expose drilling personnel to contaminated soils and water. Moreover, during construction of wells in close proximity to the zone of contamination, proper sealing and isolation of separate aquifers is required and extremely critical to prevent possible contamination of deeper aquifers and minimize potential liability. Therefore, **PRIOR TO ANY DRILLING IN THESE AREAS** please contact EPA Region 10 @ 206-553-2709 for more specific information about this area of concern.

NOTE 4: High levels of **Volatile Organic Compounds** have been measured in the shallow aquifer in the vicinity of the intersection of **Jackson Hwy and the Forest Napavine Road East**. The area of investigation extends within a 1 mile radius of the intersection. Drilling into the impacted aquifer could expose drilling personnel to contaminated soils and water. Moreover, during construction of wells in close proximity to the zone of contamination, proper sealing and isolation of separate aquifers is required and extremely critical to prevent possible contamination of deeper aquifers and minimize potential liability. Therefore, **PRIOR TO ANY DRILLING IN THESE AREAS** please contact Washington State Department of Ecology, at (360) 407-7115 for more specific information about this area of concern.
