

Become a WSU Lewis County Master Recycler Composter!

In partnership with Lewis County Solid Waste Utility and WSU Lewis County Extension, Master Recycler Composter volunteers provide educational outreach to promote public awareness of a variety of environmental and social issues like soil and water pollution, natural resource & energy conservation, consumerism, and reducing, reusing, & recycling solid waste.

Thanks to our sponsors and supporters!

Join our email list to stay informed about our upcoming Repair & Sustainability Fairs!

2025 event locations:

- ◆ April & Sept. Centralia College (SWFT Center)
- ◆ March: Centralia College (Morton Campus)

The MRC Tool Bucket Library is similar to a book library, where members can borrow a wide range of tools for short-term projects, instead of buying new ones and storing them when it might be only needed for one-time use.

The tool library is under development and is expected to be open in early 2025!

Contact us for more information or to join our email list!

Repair & Sustainability Fair

Saturday
Sept. 21, 2024
10 am — 2 pm
Centralia College
SWFT Center

Repair & Sustainability Fair

Welcome to our Repair & Sustainability Fair!

1. While you're waiting for the next available Fixer volunteer,

- Please visit the information tables of our exhibitors and other partners.
- Donate gently used items or take some home at the "Stuff Swap" table.

2. During the repair, please remain with your volunteer "Fixer" to provide information on your item and to observe the repair process.

3. After the repair, please complete an exit survey to help us improve our efforts and to be entered to win a GEOBIN Composter!

- To celebrate with you, consider getting a picture with your repaired item.

4. If you have other items needing fixed, schedule a time to visit our Repair Clinic at the WSU Lewis County Extension office.

Don't forgot your **FREE** door prize ticket at the registration table!

Drawings every 15 minutes!

Check the whiteboard for your number!

Why do we do this?

Millions of tons of clothing, appliances, electronics, and other repairable items get thrown away every year!

With diminishing natural resources, rising manufacturing and transportation costs, products are getting more expensive to purchase and more difficult to repair.

At our **Repair & Sustainability Fair** events, volunteer "Fixers" stitch and fix various items to help the community to:

- reduce how many repairable items go to the landfill,
- save money by not having to repurchase items that can be fixed,
- learn new repair skills!

Want to be a part of the Repair Economy and make a positive and long-term impact in Lewis County and beyond?

Join our team of Fixers, Sponsors, and Supporters!

All repair specialties are appreciated and all donations are tax-deductible!

FREE CLASSES!

10:30—11:30 am

Emergency Preparedness

- How prepared are you?
- Preparing your home & family for natural/man-made disasters
- Resources & tools for preparedness

Presenter: Dick Morrison
