

Reynolds Avenue and Harrison Avenue Corridor Improvements

ABOUT THE PROJECT

Lewis County and the City of Centralia are hosting a 2nd Open House to inform you about current plans to improve more than three miles of Harrison Avenue and Reynolds Avenue between Goodrich Rd-Kuper Rd and Pearl Street (SR 507). The corridor is a pivotal connection for our growing community and is being widened to increase the number of people it serves. As a team, we are bundling seven construction projects to reduce cost, the amount of time needed to build the improvements, and the burden felt by the community during active construction.

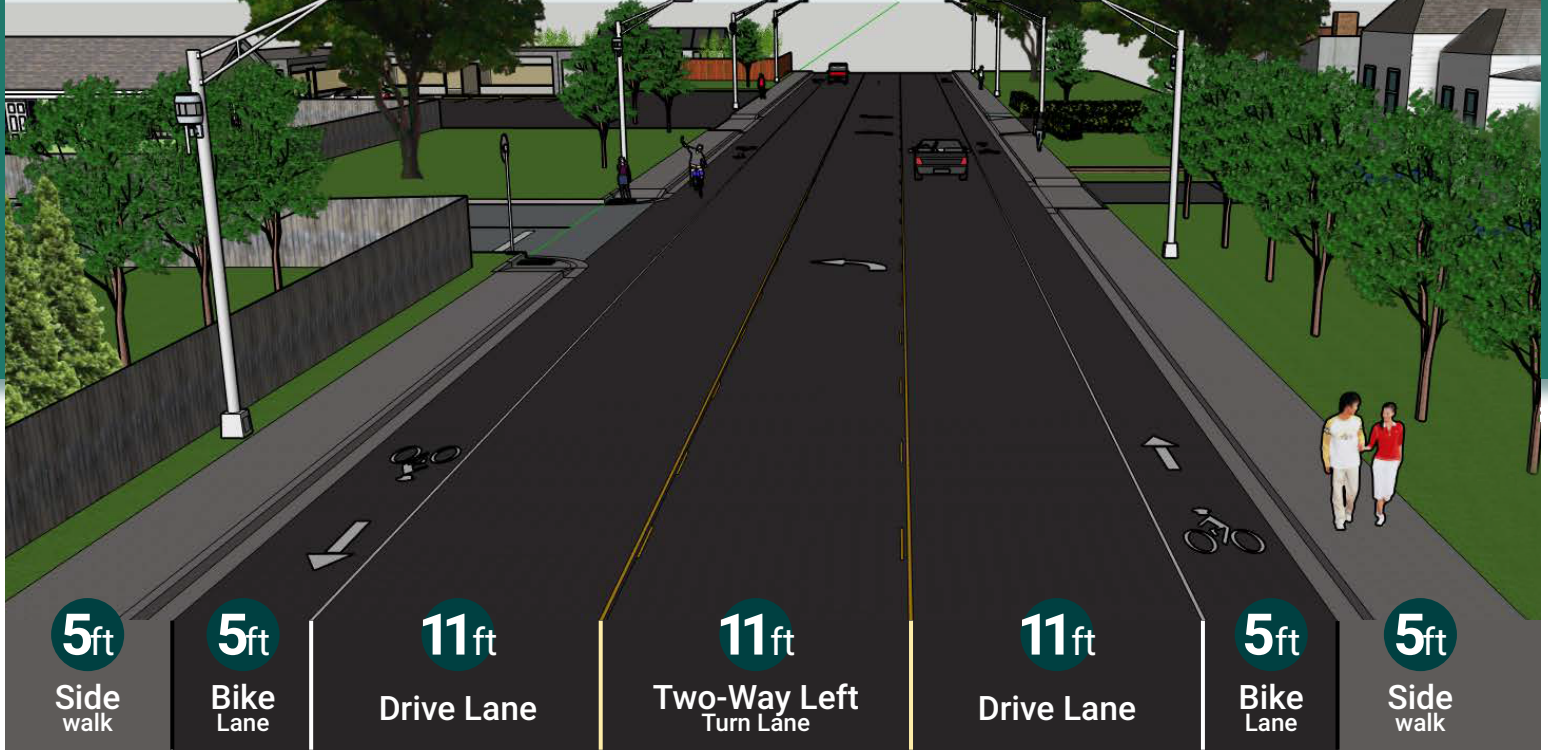

We are nearly finished assessing the presence of environmental and cultural resources in the area. Once this is complete, we anticipate finishing the design in spring 2025 and then selecting a competitive contractor before moving into construction. Construction could begin as early as summer 2025 and be finished as early as fall 2027, but the schedule is subject to change.

We need your input if you live on the corridor!

IMPROVEMENTS AT A GLANCE

- Widen the Corridor
- Median Left-Turn Lane
- Sidewalks and Street Lights
- Bicycle Lanes
- Utility and Stormwater Improvements

HOW WILL THE CORRIDOR CHANGE?

We will be widening the road to safely serve more people while upgrading utilities to better serve local businesses and residential homes in the community. The corridor will be renewed as a safer place for people driving, walking, biking, and riding the bus.

THE PLANNED IMPROVEMENTS WILL INCLUDE:

- Through lanes in each direction with a two-way left turn lane.
- Sidewalks and bicycle lanes with new streetlights to safely illuminate the roadway.
- Installation of water, sewer, and stormwater facilities, including stormwater treatment to meet water quality standards.
- Fish passage and stream improvements at Coffee Creek to support fish passage goals.
- Potentially undergrounding power, communications, and broadband utilities to continue serving our growing modern community.
- Potential pullouts for Twin Transit buses that could better serve local transit riders.

WHY IS THE CORRIDOR BEING IMPROVED?

The corridor no longer meets the current needs of our growing community because it's missing critical infrastructure like sidewalks and bicycle lanes and must be widened to support our anticipated population growth. The improvements will help people access local businesses and homes safely by walking, biking, or driving, while illuminating the road and beautifying the area.

Reynolds Ave
East of Interstate-5

WE WANT TO HEAR FROM YOU!

Thank you to everyone that attended our first open house in spring 2023 and provided your thoughtful comments. We are now further in the design process and we want your input once more. At the second open house, we will be sharing more details about the design, the anticipated construction schedule, and the planned improvements at Coffee Creek. You can stop by to speak to the project team and learn more!

OPEN HOUSE

October 24th, 2024 5pm-7pm
Fort Borst Park in Kitchen #1, 2020 Borst Avenue Centralia, WA
