

# Lewis County Emergency Management

## NOAA Weather Radios

NOAA Weather Radio is a key component of the Emergency Alert System (EAS), making it an “all-hazards” warning system. It is a comprehensive source for not only flood and weather warnings, but also immediate life-saving information from national, state, county, and local emergency officials. These hazards include tsunamis, volcanic activity, toxic releases, civil emergencies, Amber Alerts, and secondary hazards from earthquakes, and terrorism.

Tests of the NOAA Weather Radio Warning Alarm are conducted every Wednesday around midday, unless severe weather threatens, postponing it to the next good weather day.

NOAA Weather Radio broadcasting continuous weather forecasts, warnings, and information 24 hours a day direct from the National Weather Service in

**Set your NOAA Weather Radio to one of these VHF-FM frequencies:**

**Lewis County - East**  
**162.425 MHz - Channel 2**

**Lewis County - West**
