

COVID-19 WEEKLY UPDATE

Time Period Covered: September 20 to 26, 2020

This weekly update is intended to show data compiled over a week's time and confirmed data over the life of the COVID-19 pandemic. As data is verified, total numbers reported previous weeks may change in future weeks as data is confirmed.

Reporting weeks run from Sunday through Saturday. This weekly report will be based on each week ending the previous Saturday, the last full week that complete data is available for each report.

Summary

The first diagnosed (confirmed) case of COVID-19 in a Lewis County resident was reported on March 15, 2020. A person is diagnosed with COVID-19 if their PCR test for the illness returns positive.

As of 9/19/2020 *The Washington State Department of Health provides this data.*

| Description | 9/20/20 – 9/26/20 | Total 3/15/20 – 9/26/20 |
|--|-------------------|-------------------------|
| Diagnosed with COVID-19 (confirmed/positive test) <i>Numbers based on the date the positive test was reported to LCPHSS</i> | 72 | 529 |
| Recovered | | 223 |
| Hospitalized (ever during illness) | | 38 |
| Deaths | | 4 |

Lewis County Performance on Key Testing Goals

The data and the date ranges reported below come directly from the Washington State Department of Health.

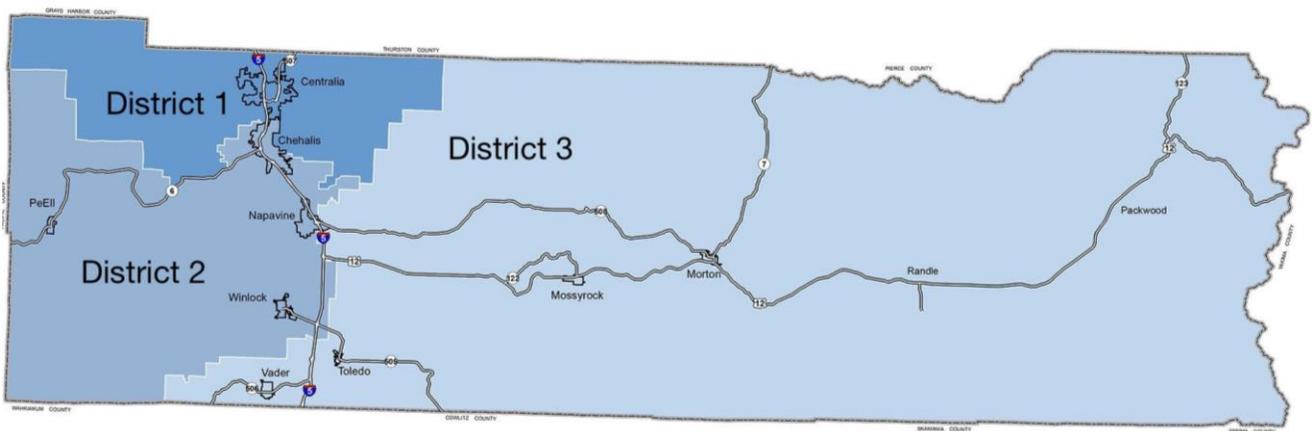

| The Washington State Department of Health has determined that meeting these goals will stop the spread of COVID-19. | | | |
|---|-----------------------------|------------------|---------------------|
| Rate per 100,000 of newly diagnosed cases between September 13 and 26, 2020. <i>Number based on the date the person was tested. Rate per 100,000 is based on Lewis County population estimate of 79,480.</i> | Goal is less than 25 | LC score is 93.1 | Goal NOT met |
| Percent of individuals testing positive for COVID-19, September 20 and 26, 2020. <i>Percentage based on the date the person was tested.</i> | Goal is less than 2% | LC score is 6.9% | Goal NOT met |

Location and Age Data

Totals as of September 26, 2020.

Total Cases and Recoveries by County Commissioner District

| District | Cases | Recovered |
|-------------|-----------|-----------|
| District #1 | 219 | 100 |
| District #2 | 212 | 84 |
| District #3 | <u>86</u> | <u>39</u> |
| TOTALS | 529 | 223 |

Total Cases and Deaths by Age Group

| Age Group | Cases | Deaths |
|-----------|-----------|----------|
| Under 20 | 61 | |
| 20-29 | 110 | |
| 30-39 | 94 | |
| 40-49 | 77 | |
| 50-59 | 75 | |
| 60-69 | 40 | |
| 70-79 | 31 | 1 |
| 80+ | <u>41</u> | <u>3</u> |
| TOTALS | 529 | 4 |

Weekly Case Numbers

The highest number of Lewis County cases in a single week occurred in Week 39 when 72 residents were diagnosed with COVID-19.

Week numbers are based on CDC reporting weeks. March 15-21 is CDC week #12.

| Reporting Week (Sunday - Saturday) | Total Diagnosed in Week | Running Total (cumulative) | Phases |
|---|------------------------------------|---------------------------------------|----------------|
| First case identified March 15, 2020 | | | Phase 1 |
| Week 12: March 15-21, 2020 | 2 | 2 | |
| Week 13: March 22-28, 2020 | 5 | 7 | |
| Week 14: March 29 - April 4, 2020 | 3 | 10 | |
| Week 15: April 5 - 11, 2020 | 7 | 17 | |
| Week 16: April 12 - 18, 2020 | 4 | 21 | |
| Week 17: April 19 - 25, 2020 | 7 | 28 | |
| Week 18: April 26 - May 2, 2020 | 1 | 29 | |
| Week 19: May 3 - 9, 2020 | 1 | 30 | |
| Week 20: May 10 - 16, 2020 | 4 | 34 | |
| Phase 2 began May 22, 2020 | | | Phase 2 |
| Week 21: May 17 - 23, 2020 | 1 | 35 | |
| Week 22: May 24 - 30, 2020 | 1 | 36 | |
| Week 23: May 31 - June 6 | 1 | 37 | |
| Week 24: June 7 - 13, 2020 | 1 | 38 | |
| Phase 3 began June 19, 2020 | | | Phase 3 |
| Week 25: June 14 - 20, 2020 | 11 | 49 | |
| Week 26: June 21 - 27, 2020 | 15 | 64 | |
| Week 27: June 28 - July 4, 2020 | 18 | 82 | |
| Week 28: July 5 - 11, 2020 | 13 | 95 | |
| Week 29: July 12 - 18, 2020 | 36 | 131 | |
| Week 30: July 19 - 25, 2020 | 22 | 153 | |
| Week 31: July 26 - August 1, 2020 | 37 | 190 | |
| Week 32: August 2 - 8, 2020 | 41 | 231 | |
| Week 33: August 9 - 15, 2020 | 41 | 272 | |
| Week 34: August 16 - 22, 2020 | 49 | 321 | |
| Week 35: August 23 - 29, 2020 | 19 | 340 | |
| Week 36: August 30 - Sept. 5, 2020 | 24 | 364 | |
| Week 37: Sept. 6 - 12, 2020 | 68 | 432 | |
| Week 38: Sept. 13 - 19, 2020 | 25 | 457 | |
| Week 39: Sept. 20 - 26, 2020 | 72 | 529 | |

Congregate Care Center Outbreaks

Congregate care centers include licensed facilities, such as nursing homes, assisted living, adult family homes, child care centers, schools, homeless shelters, jail, detention and other similar group care or placement settings. An outbreak involves two or more linked cases of COVID-19. The number of outbreaks reported does not equal the number of persons involved.

- As of September 26, 2020, there are four (4) active congregate care setting outbreaks under investigation in Lewis County.

Definitions

- **Deaths:** A person diagnosed with COVID-19 who dies due to health complications related to the illness is counted as a COVID-19 death. A person with other life-limiting illness(es) who dies will only be counted as a COVID-19 death if the viral illness was the primary cause of death.
- **Diagnosed with COVID-19 (confirmed):** a person has had a laboratory (viral) test for COVID-19 and the test was positive.
- **Hospitalized:** A person is counted as hospitalized if they were an inpatient at any time during their illness.
- **Isolation:** Persons diagnosed with COVID-19 separate themselves from other people to prevent the possible spread of COVID-19. Isolation can last 14 or more days until the person is no longer considered infectious.
- **Laboratory Testing for COVID-19:**
 - The **PCR viral test** detects genetic material of the virus to determine if persons being tested have active virus in their bodies. A positive test is a diagnosis of COVID-19 infection. This is considered the most accurate test in use.
 - An **antigen test** detects certain proteins in the virus. It is faster and less expensive than a PCR viral test. However, due to its increased chance of false-negative results, it is not considered to be as accurate as the PCR viral test.
 - An **antibody test** determines if antibodies against COVID-19 are present in the tested person's blood. A positive test is an indication that that person may have been exposed to COVID-19 at some time, but is not a diagnosis of active COVID-19 infection.
- **Outbreak:** An outbreak involves two or more linked cases of COVID-19. The number of outbreaks reported does not equal the number of persons involved.
- **Quarantine:** Persons who were in close contact with another person who was diagnosed with COVID-19 separate themselves from other people to prevent the possible spread of COVID-19. Quarantine can last 14 or more days until the person is no longer considered potentially infectious.
- **Recovered:** A person who is alive and not hospitalized 28 days after symptoms began.
- **Resident:** A person who lives within the geographic boundaries of Lewis County.
