NFIP CRS 2013 - Repetitive Loss Areas
Repetitive Loss Area - Independence Rd Vicinity

Lewis County, Washington

Scale: 1 Inch = 700 Feet

Repetitive Loss sites from FEMA-NFIP list, current as of December 31, 2011. The NFIP community of Lewis County has 54 sites total, all of which are riverine flooding with 20 mitigated and 34 unmitigated locations. Of the 54 sites, 2 properties along Garrard Ave have been annexed by the City of Centralia since December 31, 2011.

Parcels in the SFHA were determined by matching the Assessor’s structure and parcel data with GIS. There are 3,052 parcels in the NFIP community with greater than 9% of their total area contained in the SFHA. As per the CRI description for primary structures, there are 3,179 structures located on these parcels.

Repetitive Loss Area parcels were selected from within a half-mile buffer of each Repetitive Loss site. Each parcel on the list has a primary structure with more than 9% of the parcel area contained in the SFHA. Of the 447 parcels in the Repetitive Loss Areas, there are 509 primary structures located on these parcels.

The accuracy of the map has not been verified, and it should be used for informational purposes only. Any possible discrepancies should be brought to the attention of Lewis County Geographic Information Services.

Parcels in the SFHA were determined by matching the Assessor’s structure and parcel data with GIS. There are 5,052 parcels in the SFHA community, with greater than 9% of their total area contained by the SFHA. As per the CRS description for primary structures, there are 5,775 structures located on these parcels.

Repetitive Loss Area parcels were selected from within a half-mile buffer of each Repetitive Loss site. Each parcel on the list has a primary structure with more than 9% of the parcel area contained in the SFHA. Of the 447 parcels in the Repetitive Loss Areas, there are 509 primary structures located on those parcels.
