

Lewis County Department of Public Works

Josh S. Metcalf, PE, Director
Tim D. Fife, PE, County Engineer

REYNOLDS AVE / HARRISON AVE CORRIDOR IMPROVEMENTS

OVERVIEW

Lewis County and the City of Centralia are collaboratively working together for the improvement of the Reynolds Avenue corridor between Harrison Avenue and Pearl Street (SR 507) and Harrison Avenue corridor between the Harrison Avenue – Reynolds Avenue intersection north to the Harrison Avenue – Goodrich Rd-Kuper Rd intersections.

Figure 1 - REYNOLDS AVE - EAST OF INTERSTATE 5

Figure 2 - HARRISON AVE - NORTH OF REYNOLDS-GALVIN RD INTERSECTION

These improvements will consist of widening both roadways to provide a through lane in each direction with a continuous two way left turn lane, curb, gutter, and sidewalk, bicycle lanes, water and sewer utilities, stormwater conveyance and treatment facilities, and street light infrastructures. The project will also include relocating and/or possible undergrounding of power, cable, telephone, and broadband utilities, and consider the installation of bus pullouts.

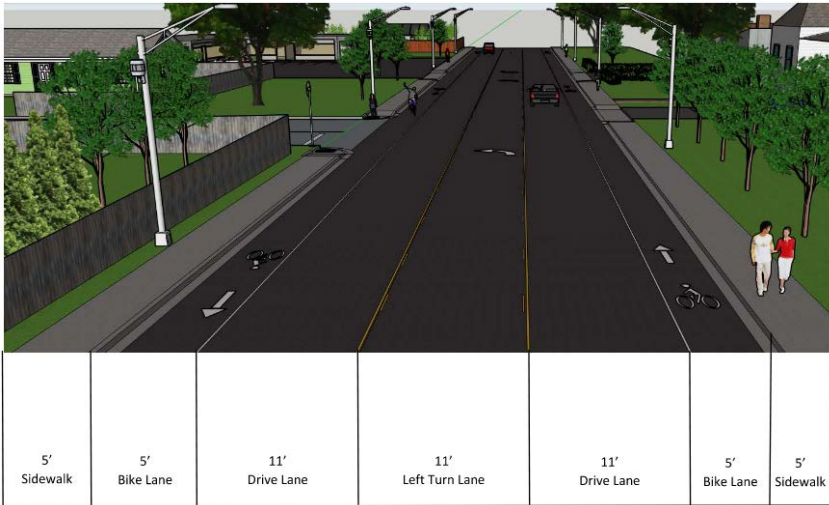

Figure 3 - TYPICAL ROADWAY SECTION

The County/City has retained the services of WSP-USA, an engineering consulting firm, to provide assistance for design of the project. Design elements associated with the project will consist of plan development including identifying and addressing environmental and cultural resource impacts, implementing a vigorous community engagement process for obtaining vital feedback from the public as the project progresses, and finalizing plans, contract specifications, and engineer's estimate of probable construction costs to support construction of the project.

SCHEDULE

A project of this magnitude it will take up to 18 months to complete all phases of the project to address all elements of the project and complete plans and contract documents to support construction of the project. WSP-USA will commence with design of the project December 2022 and provide final construction documents for contractor bid by the end of June 2024. Future construction of the project is anticipated to be an additional 24-month period following award of the contract to the selected bidder.

WHAT YOU MAY SEE

The County's consultant, WSP-USA, will be on-site within the next couple of weeks to collect data for use in assessing possible project needs and impacts on adjacent properties to support them in design and plan development of the project.

CAN THE PUBLIC PROVIDE INPUT?

Public participation is critical to the success of projects of this type and is strongly encouraged. A series of meetings are planned at key milestones during the design/development phase of the project to invite comments from the public. In addition to Public Engagement meetings the County / City will also post information about the project on their respective websites for the community to access and comment on during various stages of the project. The respective websites can be accessed as follows:
