Karen Witherspoon, AICP, Senior Project Planner
Lewis County
Community Development
2025 Northeast Kresky Avenue
Chehalis, WA 98531

Dear Karen Witherspoon:

Thank you for the opportunity to comment on the determination of nonsignificance for the Cowlitz Timber Trails Association (CTTA) RV Park Shoreline Development Project (SEP19-0029, SHD19-0009, LDR19-0067, FD19-00056) located at 1988 Spencer Road as proposed by Cowlitz Timber Trails Association (CTTA). The Department of Ecology (Ecology) reviewed the environmental checklist and has the following comment(s):

SOLID WASTE MANAGEMENT: Derek Rockett (360) 407-6287

All grading and filling of land must utilize only clean fill. All other materials may be considered solid waste and permit approval may be required from the local jurisdictional health department prior to filling. All removed debris resulting from this project must be disposed of at an approved site. Contact the local jurisdictional health department for proper management of these materials.

TOXICS CLEANUP: Jackson Barnes (360) 407-6248

If contamination is suspected, discovered, or occurs during development, testing of the potentially contaminated media must be conducted. If contamination of soil or groundwater is readily apparent, or is revealed by testing, the Department of Ecology must be notified. Contact the Environmental Report Tracking System Coordinator at the Southwest Regional Office at (360) 407-6300. For assistance and information about subsequent cleanup and to identify the type of testing that will be required, contact Andrew Smith with the Toxics Cleanup Program at the Southwest Regional Office at (360) 407-6316.

**WATER QUALITY/WATERSHED RESOURCES UNIT:
Morgan Maupin (360) 407-7320**

Construction Stormwater General Permit not required for proposed activities.

Erosion control measures must be in place prior to any clearing, grading, or construction. These control measures must be effective to prevent stormwater runoff from carrying soil and other pollutants into surface water or stormdrains that lead to waters of the state. Sand, silt, clay particles, and soil will damage aquatic habitat and are considered to be pollutants.

Karen Witherspoon

Page 2

Any discharge of sediment-laden runoff or other pollutants to waters of the state is in violation of Chapter 90.48 RCW, Water Pollution Control, and WAC 173-201A, Water Quality Standards for Surface Waters of the State of Washington, and is subject to enforcement action.

Ecology's comments are based upon information provided by the lead agency. As such, they may not constitute an exhaustive list of the various authorizations that must be obtained or legal requirements that must be fulfilled in order to carry out the proposed action.

If you have any questions or would like to respond to these comments, please contact the appropriate reviewing staff listed above.
